

Learner Consent for Hwb Additional Services

Setting up and using the online consent form templates in O365

This guide is aimed at:

Digital Champions in schools.

Rationale:

Following demand from schools, as well as the printable learner consent forms, online forms are available which Digital Champions can duplicate (and edit) to collect consent for their school:

- from parents or carers
- from learners aged 13+ years with “the competence to understand and consent for themselves” (see note 1 below)

Schools are, of course, free to design their own form, however, this guide provides instructions on how to use the template. Once duplicated, a copy of the form will appear in **your own Office 365 Forms** application where you can amend the text, theme or distribution settings without affecting the original and where you will receive the results in **your own** private account.

It is important to consider how you may verify responses i.e. is the name and email address of the responder known to your school administrators?

Duplicate and create my own form

 - ii. **Share as a template:**

Sharing this link will allow the form to be duplicated. (This was how the original template was created!)
 - iii. **Share to collaborate:**

Sharing this link enables you to invite other members of staff to view and edit the form and to see the results.
8. The form is automatically saved as you work on it. Click on the **Forms** button (next to the **Office App Switcher** waffle on the top left hand side of the window) to view all the forms you have created.
9. Once your form is ready, distribute using your chosen option as outlined in 7.d.i. above.
